GRAND BEAU-RIVAGE INTERLAKEN

A proposal.

Ownership, price and care, the way I picture it. We are happy to talk about all of it together.

◇

I

What belongs to you

Website, code, menus, printed matter, posts and brand book belong to your house.

Domain, server and all accesses run in your name.

The photos stay with you and your photographers.

The material folder sits with you.

Should we ever go separate ways, you take everything with you.

◇

II

The price

The build ····· You name the amount

As in the letter: you name the amount you feel comfortable with.

Core Care ····· CHF 350 per month

- *Server, domain, backups, updates, security and data protection.*
- *The tools keep running: Le Bureau, La Carte, La Réception, Le Livre, Le Registre, L'Imprimerie.*
- *I fix errors free of charge; an outage comes before everything else.*
- *A reply by the next working day at the latest.*
- *Your team maintains the content itself.*

Managed ····· CHF 700 per month

- *Everything in Core Care.*
- *Seasonal changes come from me without anyone having to ask: winter, summer, holidays, with texts, images, menus and printed matter.*
- *I keep the knowledge of the reception chat up to date, so it knows new offers, times and prices.*
- *Instagram posts every month in the style of the house.*
- *A short monthly report: where guests come from and which pages they view, plus the ongoing optimisation of the structures.*
- *A reply on the same working day.*

Wishes beyond that ····· Offer beforehand

A further section or a new function: for that I am happy to make you an offer beforehand.

Both ways cancellable monthly, amounts net.

◇

III

Ongoing care

Until the move we keep adjusting until it is right.

Print shop, photographers and proofreading outside the house remain your invoices, as do the fees of your current systems.

◇

IV

Where the AI works

Four places use a language model. It runs on your hotel's own account with the provider: you pay there directly according to use; I set up the account and put a monthly limit in place. This is not included in the care plans. Every place keeps working without AI.

The chat for your guests ····· La Réception

Answers guests on the website from the hotel's own pages and documents. Whatever it should learn, La Réception reads in from a link.

Reply to an enquiry ····· La Réception

A guest's enquiry becomes a draft in the tone of your emails. It only goes out once someone from the team sends it.

Five drafts ····· L'Imprimerie

One sentence is enough for five drafts in the hotel's style. The finished templates work without AI too.

One brand check ····· Le Livre

Checks a draft, such as an advertisement from the printer, against the hotel's brand. Nothing is stored.
